

Photovoltaic System Designer / Estimator

Are you looking to accelerate your career with a company that is well positioned in one of the fastest growing industries? Are you an experienced commercial PV system designer and estimator with construction experience? If so, we'd like to talk with you.

Independent Energy Solutions, Inc. (IES) is one of the nation's most respected commercial photovoltaic design / build firms. We are headquartered in North County San Diego and enjoy an extraordinary reputation with clients that include SDG&E, Qualcomm, Pfizer, the U.S. Navy, Camp Pendleton, and many more... IES designs and builds commercial PV systems of all types, including roof-mounted systems, ground-mounted systems, solar carport/shade structures, and complex hybrid and off-grid generation plants.

IES is currently searching for an experienced PV System Designer / Estimator. In this role, you will report to the Vice President of Business Development and be responsible for supporting IES' overall business development efforts with primary responsibility for completing job walks, creating of conceptual PV system designs, estimating projects, value engineering and proposal creation.

Responsibilities:

- Attending Job Walks / Site Assessments
- Create preliminary / conceptual array and system designs
- Develop accurate estimates for all projects/bids/proposals
- Work closely with the Business Development Team to consistently and efficiently estimate projects, develop winning proposals, and cultivate long-term client relationships.

Minimum Required Qualifications:

- 1 year experience as a commercial photovoltaic system designer & estimator (laying out and estimating projects in excess of 100kw for inclusion in sales proposals)
- 5 years experience in the Construction and/or PV Industry
- Strong Microsoft Office (Word, Excel, Outlook) Skills
- Strong written and oral communication skills.
- Strong interpersonal skills.
- Ability to effectively prioritize and execute tasks in a high-pressure environment.

Preferred Qualifications:

- Experience with Microsoft Project, Auto CAD LT, and/or MS Visio
- 4 year college degree

Work Environment:

- Travel will be required for the purpose of meeting with customers or off-site personnel/management.
- Ability to walk construction job sites, climb ladders and get hands-on when necessary.
- Physically able to participate in training sessions, presentations, and meetings.
- Sitting, standing or walking for extended periods of time.
- Manual dexterity to operate a computer keyboard, mouse, and other devices and objects.
- Overtime may be required to meet project deadlines
